CLERF QUARRY SITE  
(DNR PERMIT 70 012735)

Plan superseeds sheet 1 of 1  
Titled: Dist. NO. 5 Reclamation Plan  
Quarry Site OS-S-203  
Date: 3-6-72

1. Quarry site OS-S-203 is located in Kittitas County off Mundy Road approximately 4 miles East of Kittitas. The 15-acre site is owned by the W.S.D.O.T. and is zoned GMA Agriculture 20 by Kittitas County. The South and West boundary adjoin Clerf Quarry (DNR Permit 70 012735).
2. The existing terrain effectively screens the view of the quarry from the surrounding state and county roads.
3. Vegetation in and around the site consists of poor quality native dry land forbs and grasses to the South and East. The land to the North is irrigated and used for grazing. The land to the South and West is presently known as Clerf Quarry. A quarry operation, home site, irrigated and dry land grazing are presently using the land surrounding the site.
4. All operations within the quarry will comply with county, state, and federal permits and regulations.
5. Excavated quarry floor will function as a retention/detention for storm water.
6. The reclamation setback will be 30 feet in all areas of the quarry, except along Clerf quarry, which will be mined to the ultimate reclamation.
7. Overburden depths range from zero to one foot approximately. The excess overburden and waste material will be placed on the quarry slopes and floor as directed by the engineer to achieve the reclamation plan.
8. All disturbed areas with one foot or more topsoil shall be seeded with perennial grass.
9. No contaminates are anticipated.
10. After each use, the site shall be cleared of rubbish, temporary structures and equipment, and shall be left in a neat, presentable condition.
11. Contour lines shown are approximate only and minimum slope requirements and rounding for natural appearance shall govern in reclamation grading.
12. Subsequent use: poor dry land grazing.
13. Record of survey recorded in book 26 of "Surveys" on page 20 records of Kittitas County, Washington.
